"""This is the way to represent a
        Multiline Comment in Python"""

#This is a Single line Comment

- In Python, a common commenting technique is to use a triple quote for multiple-line comments. When you use a triple quote without assigning it to a variable, everything between the triple quotes is considered a comment:

- If you put a "#" symbol anywhere on a line, everything from that point to the end of the current line is a comment

Comments in Python
